

ADRIANA RESTREPO, MSc

Biodiversity & Environmental Expert

Proposed role: Biodiversity and Environment Expert — End-term Evaluation of the ISLA Program (IDH), with contribution to the Colombia (Huila) landscape analysis.

EDUCATION

MSc Biology

University of Antioquia · 2015

BSc Biology

University of Antioquia · 2004

Diploma in Management Skills

EAN University · 2021

CORE EXPERTISE

- Biodiversity baselines & monitoring
- Nature-related risk (TNFD)
- Responsible sourcing & supply chains
- Socio-ecological / landscape planning
- Land-use & ecological data analysis
- Multi-stakeholder coordination
- Project & team management
- Science communication

LANGUAGES

Spanish — native

English — reading & writing

English — spoken (intermediate)

AVAILABILITY

Nov 2026 – May 2027, including field travel to programme landscapes.

PROFILE

Biologist (MSc) with 15+ years of applied research and project coordination in Colombian Andean and Amazonian-piedmont landscapes. Expertise in biodiversity baselines and monitoring, socio-ecological planning, nature-related risk assessment under the TNFD framework and responsible supply-chain approaches. Experienced in designing data-collection strategies, analysing ecological and land-use data, and translating evidence into decisions for corporate, public-sector and territorial stakeholders. Lifelong resident of a coffee-growing landscape, with direct understanding of smallholder coffee systems.

EXPERIENCE

Socio-environmental Coordinator

UT Ambientales Toyo, Colombia

2026

- Managed budget, schedule and human, logistical and technical resources of the socio-environmental contract.

Associate Researcher

Alexander von Humboldt Biological Resources Research Institute

2019 – 2026

- Coordinated the *Nature Positive* component with Ecopetrol: nature-related dependencies, impacts and responsible supply-chain practices aligned with TNFD.
- Coordinated the Socio-Ecological Plan with GeoPark, leading to the company's first TNFD-aligned disclosure report.
- Coordinated the baseline to evaluate Gran Tierra Energy's remediation strategies in the Puerto Vega-Teteyé corridor (Putumayo).
- Coordinated the regional biodiversity baseline for the Comprehensive Research Pilot Projects on hydraulic fracturing (Magdalena Medio).
- Coordinated inter-administrative agreements with AMVA and the Municipality of Envigado for integrated biodiversity management.

Consultant / Co-investigator

University of Antioquia

2011 – 2018

- Co-investigator in multiple hydropower-sector research projects: data-collection design, biodiversity analysis and communication to corporate and academic audiences.

KEY PARTNERS

- Humboldt Institute
- Ecopetrol
- GeoPark
- Gran Tierra Energy
- ANDI · SINCHI · WCS
- EPM · ISAGEN
- AMVA · Envigado
- University of Antioquia

LANDSCAPES

- Northern Andes (Antioquia)
- Andean-Amazonian piedmont (Putumayo)
- Magdalena Medio
- Mompós Depression
- Coffee-growing Andes

FIT WITH TOR REQUIREMENTS

ToR requirement	Evidence
Commodity production, conservation, livelihood trade-offs	TNFD responsible-sourcing work (Ecopetrol, GeoPark); baselines in agricultural landscapes; coffee-landscape knowledge
Colombian context	15+ years of fieldwork in Antioquia, Magdalena Medio and Putumayo
Primary data with government, private sector, communities	Inter-institutional agreements (AMVA, Envigado); corporate partnerships
Land-use & biodiversity data analysis	Monitoring design, statistical and spatial analysis
ES9 · I2 · S2 (deforestation, biodiversity, unintended effects)	Outcome baselines; threshold responses of fauna to habitat condition
